[3] Waste (WS)

[3.4] Inorganic Waste Treatment

<p>Attempts to reduce inorganic waste at SWU (Ongkharak Campus)</p>	

Description:

Metal is resold for other purposes. 100 percent of single-page printouts are reused by being sent to the company to treat. The rest of papers are treated and sold. Papers for consumable products such as paper cups are separated and resold. Certain types of plastic such as plastic bags and PET bottles are treated with pyrolysis process. Most of inorganic waste is treated both inside and outside campus (by third parties). Thus, the amount of inorganic waste treated is 25-50%.
